VOLUME 21, No. 42

CAMPBELL, SANTA CLARA COUNTY, CALIFORNIA

FRIDAY, APRIL 21, 1917

What to get to eat.

That is a question every Housewife must ask or answer three times every day.

Well, there is Rebers Pearl Milk Hominy 10c a can.

Van Camps Red Kidney Beans at 2 for a quarter.

And Sandwich Tuna a large can at 10c.

And, Sockey Salmon Steak at 15c.

And Arrowhead Brand Cal. Ripe Olives, qt. can at 30c.

And Golden Harvest Flour at \$1.65 for 50lbs.

And Potatoes, Apples, Bananas and Oranges.

And Banquet Brand Coffee 35c lb. also Kona 40c lb.

And Banquet Brand Tea English, Breakfast, Celon, or Japan, 25 and 50c. pkgs.

And that isn't near all. But we thank you.

FARMERS UNION BRANCH

Now that the season is at hand again *would* it not be well for you to look into the conditions under which the milk that you get is produced?

Remember that by getting milk that is drawn with a mechanical milker you are sure of a product that has not been contaminated by flies, hair, dust etc.

Mass Meeting

The mass meeting called by the grammar school trustees and committee from the Improvement Club on Monday evening was well attended, although many others should have been present.

Chas. Berry called the meeting to order, after which Geo. E. Hyde, one of the heaviest taxpayers of the district, was elected chairman, and H. C. Smith, secretary.

The committee submitted its report as recommending a plan providing for six class rooms, so arranged as to admit of being easily added to, both rooms and assembly hall, and requiring bonds of \$16,000.

Mr. Wolfe was then called upon to present his plans and statements of cost to the taxpayers of the two schools, as provided for by the \$16,000 bonds, and with the assembly hall, calling for \$20,000.

The matter was very thoroughly discussed. When requested, the committee stated that they made the recommendation for the \$16,000 building not from personal choice, but because they had arrived at the opinion that that was all they were hopeful of getting.

When the comparison of figures was made and it was shown that the building which would best further the education of our children and meet the real needs of the school, would mean but three cents on a hundred dollars of assessed valuation more, the consensus of opinion was greatly in favor of the building with the assembly hall, and a motion was carried that the trustees call an election asking for \$20,000 bonds. We would be glad to explain the many arguments presented in favor of the latter building and why it would be better to build it now, but lack of space forbids.

The chairman several times requested that those opposed to bonds, or to the larger school, present their views and a very few responded, although as he stated there were undoubtedly more.

The assessed valuation of this district in 1915 was \$765,000. The issue of \$20,000 bonds of \$1000 each at 5 per cent, payable one each year the rates being reckoned on each \$100 of assessed valuation, will cost 31 cents for the first year and 14 cents the last year, an average of 21 cents per year per \$100.

Local and Personal

Congress playing cards at Smith's.

Ask merchants for contest coupons.

Warren Shelly and Claude Gard made a trip to Westley last week.

Will E. Wright came over from Pacific Grove Monday to look after his ranch.

Miss Edythe Edmonds of San Francisco is enjoying her vacation here, the guest of Mrs. G. C. Bradford.

Messrs. and Mesdames J. L. Hagelin and O. Strom returned Tuesday evening from their auto trip in the San Joaquin valley.

C. T. Fawcett left Monday afternoon for Rosebud, Montana, where his daughter, Mrs. F. G. Wells were guests of honor at a farewell party given by Mr. and Mrs. E. C. Merrill Tuesday evening.

Games were followed by a delicious chafing dish supper for which Mrs. Merrill is quite noted. Mrs. Christie will enter St. Luke's Hospital the first of May to begin training as a nurse.

Mrs. J. E. Olds entertained a company of ladies Friday afternoon in honor of her daughter-in-law, Mrs. C. C. Olds. The house and grounds were a bower of roses and the day a beautiful one. Progressive whist was played and delicious refreshments served, among them a "home recipe" ginger ale, and Mrs. Olds' famous glace fruit. Those present enjoyed a very delightful afternoon.

F. G. Wells has traded his property on Payne Avenue to Geo. A. Snow for a well improved ranch near Delta, Utah, where they expect to reside. Mr. and Mrs. Wells have a very beautiful new home here in which their friends have been hospitably entertained. They have been very active in social affairs at Moreland and in Campbell and will be missed by a wide circle of friends, who, however wish them success in their new field.

School Picnic

The school picnic Saturday under the charge of the Home and School Club proved a most enjoyable occasion. Quite a percentage of the school was present with a generous representation of mothers and a few fathers. The country is very pretty now with quantities of wild flowers, which the children enjoyed gathering. Baseball games were indulged in and a number of the boys had a swim in the crusher tank and pool.

The dinner table was not the least of the attractions and every one did full justice to the generous spread. The Fifth graders were honor guests, having won the attendance contest at the last two club meetings and they were favored with a specially decorated cake.

The club wishes to thank the mothers who so heartily co-operated in the suggestion, and the teachers, who all helped very materially in making the day a success.

Developing Fast

The Campbell Athletics will be "off" early in May, their first game, in all probability being with Los Gatos.

Manager Bradford is arranging with the management of the San Jose Round-up for a series of games to be played during the Big Round-up at Luna Park, July 1, 2, 3 and 4.

Several of our citizens have come to the front and expressed their desire to assist the club financially, and the organization is being whipped into shape. The following members are enrolled for tryout work and it is the consensus of opinion that there will be no trouble at all in getting at least twelve good players. Pitchers "Pat" Kennedy, "Busher" Pierce, and McKenzie; catchers, Oliver and Bydekarken; infielders, "Rube" Gardner, Ed. Kennedy, Al Bulmore, Gus Lancaster, and Harold Morton; Outfielders, Ludwig, Andy Monogue, Chauvin, Benner, and others. Of this aggregation, McKenzie and Bulmore will be remembered as gracing the old Campbell Club with their work, and from all indications there will be no doubt that these boys can really "come back". "Rube" Gardner was a member last year's "High" and was undoubtedly one of their stars. Oliver, who has developed into one of the best all-round ball players that Campbell has developed, together with Bydekarken, Kennedy (Ed), Pierce and Ludwig, are members of this year's "High". Gus Lancaster has been with San Jose Normal and bears an enviable reputation as a ball player. "Pat" Kennedy has produced into a whirlwind and received an offer to play with the fast Mission League this season, but passed this up in order to give his services to his home town. The pitching staff is unusually good in that all of them are good stick artists and fast on the bases. The Club certainly looks to us like a winner.

Don't overlook your subscriptions. The boys expect to work out next Saturday in their new uniforms.

High School Notes

The tercentenary celebration of the death of Shakespeare has been postponed; it will probably be given the 12th of May. Full and definite announcement will be made later.

The girls' literary society held an open meeting last Friday, at which most of the Student Body was present. Stella Leviston was in the chair, and Delpha Wiesendanger was the secretary.

The following program was given:
Violin and piano duet.....
.....Cecile and May Ellison
Reading—"My Own Araminta, Say 'No'".....Miss MacGuire
Piano duet.....
.....Joyce Robson and Harriet Dunphy
Reading—"The Fall of the House of Usher".....Ruth Hamilton
Piano duet.....
.....Alice Johnson and Doris Leviston

Congregational Church

"The Friendly Church just around the Corner."

Next Sunday is Easter! We start with a "Sunrise Meeting" at 6:30 to which all—whether Endeavorers or not are invited. Special Easter services at 11 a. m. and 7:30 p. m. with appropriate music. "The Easter Message" at 11 o'clock, with a talk to the boys and girls on "Let your Light", an Easter Lighthouse lesson.

At 7:30 will be our Tenth Annual Easter Masonic Service, to which all are invited, with a special invitation, and seats reserved for Masons and their families. Sunday-school and C. E. as usual but with the Easter thoughts.

Spend your Easter with us if you have no other church home. Let us make this Easter—when half the world is suffering the torments of hell—one of deep spiritual value and uplift.

GEO. E. ATKINSON, Pastor.

Blaine's The Store of Quality Blaine's

New Potatoes are becoming cheaper. We have some nice ones at 3c a pound.

Wesson Salad and Cooking Oil is growing more popular daily. Remember, Wesson Oil is the cheapest of the high-grade salad oils. Prices are 30c, 60c, \$1.20.

Malt Vinegar—have you ever tried it? The old-fashioned cider vinegar has been king for a great many years, but it doesn't deserve to be any longer. Malt Vinegar is better in every respect: water white, no sediment; smooth flavor, not harsh like the old kind. The price is 10c a quart, 30c a gallon.

Talbot's Ant Powder will fix those ants that are such a nuisance these days. Sprinkle the powder where the ants will have to crawl over it—they'll not appear again very soon. Talbot's is non-poisonous—no risk where children are about. 25c a sifter-top box.

Try this. A salesman gave us this recipe for a sandwich preparation. Melt one-half pound of sharp cheese over slow heat. Stir until smooth. Add a 5c can of Carnation Milk, slowly, stirring until the whole is a smooth paste. Pour into cups or glasses and allow to cool. Spread on thin slices of bread, or crackers. This preparation will keep for a week or so, and is said to be very fine. If you try this we should like to have your opinion of it.

Bulk Peanut Butter is a big seller now-a-days. How do you use it? At our house we mix water with peanut butter until it is about the consistency of cream. This removes that sticky taste, and we like the flavor much better. Mix only a small amount at a time, as it will not keep long after the water is added. Bulk Peanut Butter is cheap at 15c a pound.

IN FORM OF LADDER

Ship Really Climbs on Its Passage Through Locks.

Economical Device Where Waterway Has to Be Cut Through High Country—Superiority Over Tide-Water System.

It is a fact that a ship really climbs a ladder.

Each step in the ladder is a small lock in which the ship can float. To begin the ascent a pair of gates at the bottom of the ladder is opened and the ship sails in. Then the lowest gates are shut and more water is allowed to go into this lock, or dock, where the ship is.

When the water in this lock is level with the water in the upper lock, another set of gates is opened and the ship sails into the second lock. The gates are then shut, and when the water has been allowed to flow into the second lock, in which the ship now is, other gates are opened. And so on the ship goes up the ladder.

If it were not for the system of locks, which may be really called ship-ladders, the canal would need to be cut very, very deep where it goes through high country, so that the surface of the water would be on the same level throughout the entire length of the canal. But with locks the cutting of a canal is much easier and cheaper.

It was for this reason that the Panama canal was designed and constructed as a lock canal, although many engineers favored the tide-water or non-lock as the better system. It is claimed that the slides which have already caused thousands of dollars in damage to the canal would have been far worse had the channel been cut to a depth which would have directly connected the two oceans.

Phones Replace Waiters.

Telephones are being used in one of the restaurants at Plainfield, N. J., as substitutes for waitresses, says the Popular Mechanics. Instruments have been installed at each of the several tables and permit the guests to communicate their orders direct to the kitchen without suffering delay. The activities of the waitresses are confined solely to the serving of food. To simplify the system, each menu on the card is numbered so that a patron may render his order numerically. A switchboard operator makes a record of all orders and attends to the issuance of the checks. The guests are privileged to use the telephones for outside calls and likewise may receive incoming messages without leaving their respective tables.

Warning to Motorists.

A fine of \$20 "for lying" and \$5 for speeding was assessed against Louis Greenspon of 5829 Westminster place, a merchant, by Police Judge Hogan, according to the St. Louis Post-Dispatch.

It was charged that Greenspon drove his machine at 25 miles an hour on Locust street, between Beaumont street and Twenty-first street. When he was arrested, Judge Hogan asked him if he had not been arrested before for speeding. Greenspon said he had not. Hogan had the record looked up, and it showed that Greenspon was fined \$5 on August 14 for speeding. "Young man," Judge Hogan said, "I fine you \$20 for lying and \$5 for speeding."

Dutch Barges on the Thames.

Belgian barges have appeared on the Thames and are probably fraternizing with those Dutch neighbors who are always to be found just below London bridge. For more than two centuries there have always been big, broad-sterned Dutch boats lying in the river, with a baggy-trousered Dutchman smoking on board quite calmly. It is the reminiscence of a Dutch conquest. Those boats have moored there, with their eels for London, ever since William III gave them the right of traffic. And if there wasn't a Dutch boat for a single second just below London bridge, the ancient rights would be lost. But you will always find the calm Dutchman smoking on his "pitch."—Dundee Advertiser.

Cashed at Face Value.

The chancellor of the exchequer of Great Britain reports the total amount of scrip vouchers sold to date to be \$25,000,000. This amount is not what was hoped for from the scrip vouchers. Now it is proposed to issue bonds in the multiples of £1. They will bear an interest of 5 per cent and can be cashed on demand at their face value at any time. In return for these facilities bonds will carry no interest for the first six months.

New Plants in United States.

Since the United States department of agriculture established the section of seed and plant introduction in 1907 this has introduced into the United States almost 50,000 varieties of plants. In the year ending last June more than 2,000 were introduced and 171,831 experimental plants and 11,465 packets of seeds were given to experimenters, of each of which a record is kept.

RUSSIA'S BLACK SEA PORT

LOOKING OVER THE HARBOR OF ODESSA

ODESSA, Russia's first naval base on the Black sea and the starting point for over-the-water attacks on Bulgaria, European Turkey and Asia Minor, is the most imposing milestone on the Muscovite's shortening road to Constantinople and the warm waters of the Mediterranean, says a bulletin of the National Geographic society. The great and flourishing port is one of the youngest cities of the East, for it was founded by Catherine II after her war of conquest against the Turk had ended in the treaty of Jassy in 1791, and its foundation was largely due to the desire to have a strong city just as near to Constantinople as possible, as a well-equipped point of departure for Slav armies of future generations.

It is said that the Russian is the dreamiest and the longest-memoried of all the races of Europe, and it has been on its way toward the world-city on the Bosphorus, where its national faith was cradled, ever since Arab invaders broke the communication between Santa Sophia and the Russian church in the ninth century. The only un-American thing about Odessa, Mark Twain said, are the cut of its droshkies and the stupendous girth of their drivers. The city is modern, new, and more European or American than any other city in the czar's empire, with the exception of Petrograd.

Becomes Great City in a Century. Odessa has only recently passed its one hundredth year, yet, at the outbreak of the war, it was ranked by but three other cities in the empire for size and commercial importance—Petrograd, Moscow and Warsaw. A few hills of mud and reeds and a Turkish fort were all that marked the site, when Catherine the Great commanded a city here. In 1802, eight years after its foundation, it numbered 9,000 Greeks, Italians, Russians and Albanians. It enjoyed, however, unusual imperial patronage for strategic reasons; even the Emperor Paul, who delighted to make vain all that owed its title to his mother, continued to favor the young town. A statue of Catherine, represented trampling the Turkish flag under foot, stands on one of the finest squares. Today the city,

wealthy, and important among world ports, houses more than half a million people.

The city lies on a semicircular bay, about midway between the mouths of the great Russian rivers, Dniester and Dnieper. It is 1,017 miles south-southwest from Moscow by rail and 610 miles south from Kiev. Varna, the nearest Bulgarian port, and one recently bombed by the Russians, lies 290 miles across the Black sea to the southwest.

Has Six Fine Harbors.

Odessa is built in the midst of a dreary steppe. It is regularly laid out in broad streets, faced with substantial modern buildings, and wears its commercial prosperity patent to the most casual visitor. Its port is equipped with six good harbors—the quarantine harbor, coal harbor, petroleum harbor, new harbor, "practical" harbor, and the harbor of the Russian Company for Navigation and Commerce, the principal shipping company of the port. The freezing of the harbors and the bay interrupts navigation for an average of 16 days each year.

Novorossia, or New Russia, which includes the governments of Bessarabia and Kherson, has its intellectual and commercial capital at Odessa. The social capital is also there, and the life of the metropolis has been described as much more gay than the life of Paris or Vienna. The nights in the Odessa of pre-war days were giddy and irresponsible, the avenues filled with people and ablaze with cafes until early morning hours. The merry-making of Odessa did not really begin in the cafes chantants until midnight, and its gayeties lasted until between three and five in the morning.

There was a dark side to the picture, the usual one to contrast with the bright in every great city. A miserable army of poor, whose ranks were largely filled by the tides of transient labor that washed the greatest trading city of southern Russia, lived from hand to mouth on stray crumbs of the place's prosperity. The number of the very poor was estimated at 35,000, and many of them lived in the extensive catacombs beneath the city, which were formed by the quarrying of sandstone for building.

THE HANDSOME OPERA HOUSE

First Guide to Beauty.

By singing, and by singing only, a little child of five may come in contact with a pure and perfect form of beauty. Not only that, but the child can reproduce this beauty entirely unaided, and in the process of doing so its whole being—body, mind, heart, and soul—is engaged. The song, for the moment, is the child. There is no possible realization of the little personality comparable to this. Here, in sounds, is that correlation of impulses in which the stars move; here is the world of order and beauty in miniature; here is a microcosm of life; here is a talisman against the cold unmeaning facts which are driven into children's brains to jostle one another in unfriendly companionship. Through this they can feel a beauty and order and sequence which their minds are incapable of grasping. The joy which a child gets in reproducing

beautiful melodies is like no other experience in life.—Thomas Whitney Surette, in the Atlantic.

A Disappointment.

"I understand you have quit making speeches on preparedness." "Yes," replied the more or less public-spirited citizen. "I became discouraged."

"Why so?"

"I discovered that the chautauqua managers were not prepared to pay me for my trouble."

'Twould Save Time.

"What have you there?" "Some garden seed." "Thinking of starting a garden?" "I was just debating the matter. I don't know whether to feed the seed to my neighbor's chickens direct, or put the pesky fowls to the trouble of scratching them up."

BIT OF REAL POLAND

VILLAGE IN ASIA MINOR HAS AN INTERESTING HISTORY.

Peopled Many Years Ago by Veterans of the Crimean War, the Community Has Maintained Its Purity and Independence.

Hundreds of miles from Poland, in Turkish territory, not far from the Black sea and the Bosphorus, there is a Polish village. It has been there for 60 years. But the news of its existence will come as a surprise both to the world at large and to the Polish Poles of Poland.

The village was "discovered" recently by a German journalist, the correspondent of a Berlin newspaper, who was watching the fighting at the Dardanelles. He sandwiched in between his dispatches describing death and destruction on the Gallipoli peninsula an interesting description of this peaceful and forgotten bit of old Poland under the title of "A Polish Island."

The village was founded back in the fifties of the last century during the Crimean war. Among the Russian soldiers fighting in the Crimea against the British and French and Turks were some from Russian Poland. Of these a number were captured by the Turks and taken to Scutari, opposite Constantinople, in Asia Minor. There some Polish noblemen, bitter enemies of Russia, found these men, and hit upon the idea of emancipating this handful of their fellow-countrymen from the control of Russia. Foremost among these noblemen was Prince Adam Czartoriski, a very wealthy man, who, from his own pocket and out of funds collected by him from other Poles who hated Russia, purchased lands in Asia Minor from Turkish owners and there established the Polish prisoners in a village of their own.

On that spot the prisoners and their descendants have continued to live to this day. When the German journalist visited the village he found a few of the original colonists still living. The villagers, he writes, are genuine Poles, still speaking their native tongue. The noblemen who founded the village fetched the wives of many of the prisoners from Poland when the village was first started, and their offspring have intermarried among themselves, thus preserving the purity of their race. Not one of them, says the German writer, has married a Turk or even learned the Turkish language that is spoken on every side of this little "Polish Island."

Much Timber Wasted.

Fifteen per cent of the timber cut in the United States is wasted every year and government experts are engaged in a number of experiments to determine to what extent a huge money loss to the country may be prevented by utilizing the waste.

One of the interesting experiments under way is the utilization of sawdust in the manufacture of alcohol. These tests have hardly more than passed an experimental stage, but technical men are optimistic as to the ultimate success of the process. Another interesting possibility is the utilization of hydrolyzed sawdust as a carbohydrate cattle food.

The use of wood for producer gas, according to officials, deserves more extended introduction in industrial plants. Dr. E. E. Pratt, chief of the bureau of domestic and foreign commerce, in a report to Secretary Redfield said that the manufacture of plastics from wood, as well as the manufacture of wood flour, has not been developed in the United States, and that European nations are far in advance of this country in the utilization of such by-products.

"Hoboism Is a Disease."

"Hoboism is not a habit, but a disease."

"There are 3,000 to 4,000 homeless men in Cleveland today—hoboes, tramps and bums."

"On the Trail of the Hobo," was the subject of Rev. John A. Gray, instructor in sociology in the extension division of the University of Minnesota, and formerly pastor in New York, who spoke under auspices of the Cleveland Lyceum bureau at East Cleveland Congregational church, Euclid and Page avenues, East Cleveland.

Rev. Mr. Gray based his assertions on a two weeks' investigation of Cleveland's homeless problem, during which he lived among hoboes, tramps and bums in the city's cheap lodging houses.—Cleveland Plain Dealer.

Bullets Which Trail Fire.

After many months experimenting, J. A. Sambrook of Ellesmere Port, England, has invented a bullet which travels at a tremendous velocity and emits a trail of sparks, which, he asserts, will pass through a Zeppelin like a comet through space and instantly blow it up.

The invention consists of an ordinary-sized bullet charged with a special preparation which ignites with its passage through the air.

The bullet can be fired from an ordinary rifle, and is easily adaptable to aircraft and machine guns.

Sign of the Times.

It is said that a Chinese statesman has just married his stenographer. China may at last be considered to have caught up with occidental civilization.

Pitch Lake of Trinidad

THE ASPHALT LAKE

MANY people have heard of the "pitch lake" of Trinidad, but very few have any idea of what it is like. Some home-keeping writers of an imaginative bent—inspired, perhaps, by the sight of a cauldron of boiling tar—have pictured it as a seething inferno of heat and boiling vapor, a sort of miniature hades. As a matter of fact, it is nothing of the kind, writes Victor Pitt-Kethley in the Wide World.

Though disappointing at first sight to people who have the crater of an active volcano in mind, yet the "pitch lake" is remarkable enough—one of nature's wonders. Apparently well-nigh bottomless, it is composed of solid asphalt, and the excavations made by day are mysteriously filled up at night, although the general level of the lake is slowly sinking. The lake is situated near the town of Brighton, in the south of the island. Travelling south from Port of Spain, the capital, one reaches the little town of San Fernando, inhabited chiefly by Indian coolies. Here a little steamer leaves daily for trips along the coast. The landlocked waters of the gulf are usually calm, and the green mountains of Venezuela are seen miles away in the blue haze. The steamer's course runs close to a shore bordered by mangrove swamps, and after several hours Brighton is reached, where the steamer stops at the long pier of the New Trinidad Lake Asphalt company, Ltd. Here we go ashore, as the pier is the most convenient point from which to approach the lake.

Brighton is an active little town, quite close to the lake, and we find ourselves at once in the midst of the asphalt industry. There is a little of the lake at the shore end of the pier and overhead the cable is singing away merrily as it carries along great buckets filled with asphalt. Dozens of neat buildings comprise the quarters where the company's employees live. Fresh paint and cleanliness are evident everywhere, and the bright West Indian sunlight gives the settlement a very pleasant appearance.

The lake is a level plain about a hundred acres or so in extent, surrounded by low hills, and dotted here and there with bushes and trees. The surface is not a shimmering black, as might be supposed, but a dull, grayish blue color, intersected with pools of shining water. Altogether it is a very prosaic-looking place, giving no hint of its real interest.

Solid Enough to Walk On.

One can walk where one pleases on the surface of the asphalt, without any fear of sinking in, for it is quite solid enough to bear one's weight. If you stand in one place for a little while it feels hot to the feet—just like an asphalted street on a very hot day. Much of the time a fresh breeze blows, and one remembers with amusement the stories of the imaginative writers who talked about stifling heat and oppressive atmosphere. These will all return to you, however, if you are unfortunate enough to get into a place sheltered from the breeze and exposed to the sun, for at such points the thermometer stands at 90 degrees or more during several hours of almost every day, which is quite near enough to the temperature of an inferno for most people.

The digging of the asphalt is a simple operation. A mattock is the only tool required, and under its blows the pitch breaks readily. The negroes employed are very skilled in the work, and break out lumps a couple of feet across, far too heavy for an ordinary man to carry. Only a very small amount of the material gets broken into little pieces, so that scarcely any baskets are needed to carry the asphalt to the cars. A laborer simply lifts one or two lumps, puts them on his head, walks a few yards, and drops them into the car. The crude asphalt, as broken out, is somewhat brownish or earthy in color. It is usually quite wet, and filled with many holes, like bubbles, measuring up to an inch or more in diameter.

The gang of barefooted workmen in one place may number thirty men, of whom half a dozen do the digging. They work on a space perhaps sixty feet long and forty feet wide, and in the course of a day they will dig down to a depth of three feet, or more in some places. Go to that same spot next morning and you will find it a

little rough but approximately level with the rest of the lake. The hole has been mysteriously filled up during the night, and in the course of a week all traces of the digging will be obliterated.

This does not mean necessarily that fresh asphalt has come into the lake from underground sources. On the contrary, the excavations are filled by a very slow settling or leveling of the surface asphalt. There is no such thing as "new" asphalt, by the way, for the transition from liquid petroleum to solid asphalt by nature's process involves a period of time that must be calculated in centuries. The digging done in past years has caused the general level of the lake to sink several feet, so that it is not absolutely inexhaustible, as some people imagine. It is believed that fresh asphalt very slowly pushes itself upward into the lake from the subterranean depths, but how large a quantity is thus added annually has not been calculated.

Lake's Depth Not Known.

Near the middle of the lake the material is less hard than elsewhere, and in a few places soft asphalt may be seen oozing up from below. This fresh asphalt is of about the consistency of putty, and can be kneaded and pulled in the hands without soiling them greatly. In the main, however, the lake is solid asphalt.

No one knows the depth of this mysterious lake, the only information on the subject being the fact that long ago a boring was made to a depth of 135 feet without reaching the bottom. The "cores" of this and other borings show that in consistency the asphalt remains the same to a very considerable depth. Curious as it may seem, there are many evidences that the entire mass comprising the lake is in constant but very slow motion. The surface is a series of great folds, and in the creases between these the rain-water gathers. One writer has aptly compared the surface of the asphalt to the skin of a great elephant, the creases being the folds in his hide. Along the edges of the pools of water, grass, bushes and small trees take root, forming green "islands" of greater or less extent.

BROTHER'S WORK ALL RIGHT

Proof That There Is More Than One Way of Leading Man to Make a Proposal.

Before his mirror Jack Maguggle carefully painted freckles on his handsome face, drew on a false wig and beard and hid him to the opera, where his ticket called for a seat in box A.

In box B sat a lovely young woman charmingly attired in a sen-sen-colored gown relieved by peanut bars. With her was a saturnine youth with an American beauty rose in his buttonhole.

Jack Maguggle stared at this young dream of beauty intently. In fact, never once, even during the exquisitely sung "Simpadoux" aria, did he remove his eyes from that vision of loveliness. And as he stared he made no attempt to hide his adoration.

The escort of the gorgeous young woman scowled and attempted to catch Maguggle's eyes, but Maguggle's eyes, as aforesaid, were busy. After the opera Maguggle, waiting in the foyer, slipped a note into the fair one's hand. The escort saw and his face grew black.

Maguggle arrived home before his sister, whose first words were: "Oh, Jack, thanks awfully! He proposed three times without stopping, coming home in the taxi. Wherever did you get that wig?"—Detroit Free Press.

Frank Avowal.

"I wish to marry your daughter," said the straightforward young man. "What do you wish me to do?" "Speak a good word for me."

"My friend, I'd do anything in my power for you. But if you realized how little influence I have with mother and the girls, you'd realize that you are playing mighty poor politics."

To Be Handled With Care.

"A little nonsense now and then—" "I know," replied Senator Sorghum. "But that fact doesn't justify some of us in taking it seriously and acting as if we were proud of it."

Clean, Odorless, Safe. Approximately seventy-five candle-light for one cent an hour. We will ship lamp complete, including Lamp, Chimney, two Mantles, White Opal Shade and Holder for \$3.00, charges prepaid. Make remittance to WESTERN LIGHT & FURNITURE CO., 138 S. Broadway Los Angeles

PEOPLE AFFLICTED with Kidney trouble, Bright's disease, Dropsy, Diabetes, should send \$1.00 for four weeks treatment of wonderful discovery. Results guaranteed. Address "C" Pacific Herb Co., Marshall, Ore.

Rainbow Shines at Night.

A bright rainbow in the darkness was an unusual phenomenon observed at Harrisburg, Ore., about seven o'clock at night. The full moon broke through the clouds in the eastern sky while a shower of rain fell just west of the observers.

The rainbow was perfect in outline and several of the colors were distinguishable.

It Cures While You Walk.

Allen's Foot-Ease is a certain cure for hot, sweating, callous, and swollen, aching feet. Sold by all Druggists. Price 25c. Don't accept any substitute. Trial package FREE. Address Allen S. Olmsted, Le Roy, N. Y.—Adv.

Not Opinionated.

"So my daughter has consented to become your wife. Have you fixed the day of the wedding?"

"I will leave that to her."

"Will you have a church or a private wedding?"

"Her mother can decide that."

"What have you to live on?"

"I will leave that entirely to you, sir."—Yale Record

CAP and BELLS

SCHEME FOR MAKING MONEY

Irving Bacheller, Head of Newspaper Syndicate, Would Buy Up All Great Auk Eggs in Existence.

When Irving Bacheller was running a newspaper syndicate and publishing a juvenile magazine in New York he always sat in a large porch rocking chair before a fat desk so heaped with letters that every few minutes a little epistolary avalanche would shoot down from it to the floor. One day Orson Lowell, the artist, who was a partner in the magazine, found him in a more than usually meditating mood, and said to him:

"What's the matter, Irving; got an idea?"

"Yes," answered Bacheller, very slowly, "a big one. One that will make us all rich. You know the great auk is extinct, and that there are only four of its eggs in existence. They are worth thousands of dollars apiece, and a great auk itself would be priceless. My notion is to get these eggs and hatch 'em."

"But how will you hatch them?" asked Lowell.

"Oh," answered Bacheller, visibly annoyed, "I haven't given that point any thought yet. But it's a mere detail—a mere detail. The plan is bound to succeed. And it will make us all rich."—Woman's Home Companion.

The Practice.

"I have no sympathy with these emancipated women who want to omit the word 'obey' from the marriage service, and put themselves on an equality with men."

"Yes, I believe with you, Mrs. Snap, that a man should be the master in his own house. By the way, my husband was disappointed that you'd not join his poker club. Why didn't he?"

"Oh, he wanted to badly, but I wouldn't let him."

Poor Listener.

"What was the lecturer's subject?"

"From the Cradle to the Grave."

answered Mr. Dubwaite, who escorted Mrs. Dubwaite to the hall under compulsion.

"Was the address worth hearing?"

"I can't say. I fell asleep during the 'cradle' part, and when I woke up the lecturer had just spoken the final words in the cemetery."

Woman's Way.

"I must say it's hard to give you up," said the disappointed suitor.

"Well, if it will make the parting any easier for you, I'll introduce you to a friend of mine who will help you to forget me."

"You are very kind."

"But, on second thought, I won't. If she did that I would never forgive her."

KEEPING HIS WORD.

She—My husband promised me that I should never hear a harsh word from him in all of our married life, and I never have.

He—H'm! How long have you been married?

She—Let me see. Just two days and four hours.

No Novelty.

"When I took Mrs. Gaddy out for an automobile ride she was nervous all the time for fear we should strike somebody."

"That was all put on. She's used to running people down."

The Vehicle.

"So the fight was suspended for awhile, you say. Did the defendant go home in the interim?"

"No, sir; he went to the hospital in an ambulance."

Race of Woman Warriors.

The word Amazon is Greek and was used thousands of years before America was discovered. According to tradition, it was applied to a race of female warriors who had the form but hardly any of the attributes of women. In order that they might hurl a javelin or aim an arrow more effectively, the right breast was removed to give greater freedom to the arm; hence the name Amazon from a-mazos, without breasts. In works of art, sculpture and painting, the Amazons were represented with the right side, the place of the removed breast, covered. The Amazon river in Brazil was so called by the Spanish explorer who discovered it because he said he encountered fighting women there.

Best Proof That

Resinol Heals Eczema

In our file of reports, covering a period of twenty years, literally thousands of physicians tell how successful the Resinol treatment is for eczema and similar skin troubles. The first use of Resinol Ointment and Resinol Soap usually stops the itching and burning, and they soon clear away all trace of the eruption. No other treatment for the skin now before the public can show such a record of professional approval.

Resinol Ointment and Resinol Soap work so gently, and are so absolutely free from anything that could injure even the tenderest skin, that they are ideal for healing the skin troubles of infants and children. Sold by all druggists. (Advt.)

Wasn't Calling Her Dear.

Desirous of buying a camera, a certain fair young woman inspected the stock of the local shopkeeper.

"Is this a good one?" she asked, as she picked up a dainty little machine. "What is it called?"

"That's the Belvedere," said the handsome young shopman politely.

There was a chilly silence. Then the young woman drew herself coldly erect, fixed him with an icy stare and asked again:

"Er—and can you recommend the Belva?"—Kansas City Star.

Have Healthy, Strong, Beautiful Eyes

Oculists and Physicians used Murine Eye Remedy many years before it was offered as a Domestic Eye Medicine. Murine is Still Com-pounded by Our Physicians and guaranteed by them as a Reliable Relief for Eyes that Need Care. Try it in your Eyes and in Baby's Eyes—No Smarting—Just Eye Comfort. Buy Murine of your Druggist—Accept no Substitute, and if interested write for book of the Eye FROE. MURINE EYE REMEDY CO., CHICAGO

A Reminder.

Dealer—This is the best parrot we have, but I wouldn't sell him without letting you know his one fault: He'll grumble terribly if his food doesn't suit him.

Miss Fitz—I'll take him. It will seem quite like having a man in the house.

Spring Colds Are the Worst

They lead to catarrh and pneumonia. They weaken the entire system and leave it unable to resist the sudden changes. They interfere with your digestion and lessen your activity. Neglected they soon become that dread disease known as systemic catarrh. Don't neglect them. It's costly as well as dangerous.

PERUNA Will Safeguard You

Have a box of Peruna Tablets with you for the sudden cold or exposure. Tone your system up with a regular course of the liquid Peruna, fortify it against colds, get your digestion up to normal, take care of yourself, and avoid danger. If you are suffering now begin the treatment at once. Give Nature the help she needs to throw off the catarrhal inflammation, and again become well.

Peruna has been helping people for 44 years. Thousands of homes rely on it for coughs, cold and indigestion. It's a good tonic for the weak, as well.

The Peruna Company, Columbus, Ohio

MAKE CARVING EASY

Devices That Will Be Welcomed by Many.

Inventor, It Would Seem, Has Introduced Something That Should Prove to Be a Boon to Suffering Humanity.

The jocular remarks of Mark Twain and other humorists about the difficulties and embarrassments of the man with the carving implements presiding over the roast of meat or fowl will no longer apply when the dining tables are all supplied with the meat holder which has recently been patented by a Denver man.

Mark Twain said in one of his stories that he always refused to carve except in dining rooms where the wall paper matched the color of the gravy, so that any unfortunate mishaps might not do any serious damage to the mural decoration. To one who has carved, it does seem that the usual plate on which the roast is placed for the cutting operation is inadequate and invites disaster, for a little slip of the meat will be the means of projecting a stream of the gravy over some unfortunate person seated around the board.

Two metal members with prongs on their inside are made to surround and secure the meat by bringing their two

Every Amateur Carver Skates All Over the Platter With a Roast of Fowl—This New Scheme Will Hold It Steady for Him.

free ends together, at which point they are clamped. The other ends are secured in a ball and socket joint by means of which it is possible to turn the roast over.

Baby Monoplane.

What is undoubtedly the smallest successful monoplane in the world has recently been constructed by a Californian. In addition to this distinction the machine is almost as unusual in design as it is in size, for it is driven first by an ordinary seven horsepower, twin-cylinder motorcycle engine. It weighs, complete with its gasoline tank filled, only 238 pounds, has a wing spread of 18 feet, an overall length of 16 feet, and a supporting area of about 90 square feet. The motor drives a 4½-foot propeller at about 1,400 revolutions a minute, giving the craft a speed of nearly 60 miles an hour. The power plant is placed at the extreme rear of the machine, so that its weight is balanced by that of the pilot who rides several feet ahead of it. The machine has been driven a number of times, and during these flights has remained in the air from 15 minutes to half an hour.—Popular Mechanics Magazine.

Wrong Stocking Stolen.

On one of the coldest nights this winter Mrs. Annie Dietz of 115 Mechanics street prudently wore woolen sleeping hose when she went to bed. Testifying in court against Michael Arenewich, who was held in \$500 bail on the charge of burglary and attempted theft from person, Mrs. Dietz said: "As I was placing a roll of \$400 in my stocking I heard a slight noise, and looking out thought I saw this man stepping back from my bedroom window. The next I knew I was awakened by feeling one of my stockings being pulled off. Before I could turn on a light the intruder jumped through the window and disappeared with my left stocking."

The chief reason why Arenewich was charged merely with attempted theft was that Mrs. Dietz put the money in her right stocking.—Hartford (Conn.) Dispatch to New York World.

The Man With No Initials.

Playgoers everywhere will regret to hear that that fine actor, Mr. Charles Hawtry, has had heavy financial losses owing to the war.

Mr. Hawtry can be as humorous off the stage as he is on it. On one occasion he was talking to a friend about peculiar names and initials.

"By the way," he said, "I have a friend who is in a most unfortunate position. He actually has no initials." "No initials?" exclaimed his friend in amazement. "Why, how can that be? Hasn't he got any name?"

"Oh, yes," answered Mr. Hawtry, with a twinkle in his eye. "Put you see, each of his names begins with an aspirate and, being cockney, he always drops his h's."—Redman's.

May Be Valuable Find.

Workmen digging in the bay of Guanabara, at Rio de Janeiro, recently brought up a quantity of pure phosphorus. Acting on the belief that a deposit of value had been tapped, the government was advised of the discovery and it has ordered an investigation to determine the probable size and value of the body of mineral.

CALOMEL TODAY, SICK TOMORROW

Dose of nasty calomel makes you sick and you lose a day's work.

Calomel salivates! It's mercury. Calomel acts like dynamite on a sluggish liver. When calomel comes into contact with sour bile it crashes into it, causing cramping and nausea.

If you feel bilious, headachy, constipated and all knocked out, just go to your druggist and get a 50 cent bottle of Dodson's Liver Tonic, which is a harmless vegetable substitute for dangerous calomel. Take a spoonful and if it doesn't start your liver and straighten you up better and quicker than nasty calomel and without making you sick, you just go back and get your money.

If you take calomel today you'll be sick and nauseated tomorrow; besides, it may salivate you, while if you take Dodson's Liver Tonic you will wake up feeling great, full of ambition and ready for work or play. It's harmless, pleasant and safe to give to children; they like it.—Adv.

A Deep One.

Johnny stood beside his mother as she made her selection from the huckster's wagon, and the farmer told the boy to take a handful of cherries, but the child shook his head.

"What's the matter? Don't you like them?" asked the huckster.

"Yes," replied Johnny.

"Then go ahead and take some."

Johnny hesitated, whereupon the farmer put a generous handful in the boy's cap. After the farmer had driven on, the mother asked:

"Why didn't you take the cherries when he told you to?"

"'Cause his hand was bigger'n mine."—Christian Register.

How to avoid Operations

These Three Women Tell How They Escaped the Dreadful Ordeal of Surgical Operations.

Hospitals are great and necessary institutions, but they should be the last resort for women who suffer with ills peculiar to their sex. Many letters on file in the Pinkham Laboratory at Lynn, Mass., prove that a great number of women after they have been recommended to submit to an operation have been made well by Lydia E. Pinkham's Vegetable Compound. Here are three such letters. All sick women should read them.

Marinette, Wis.—"I went to the doctor and he told me I must have an operation for a female trouble, and I hated to have it done as I had been married only a short time. I would have terrible pains and my hands and feet were cold all the time. I took Lydia E. Pinkham's Vegetable Compound and was cured, and I feel better in every way. I give you permission to publish my name because I am so thankful that I feel well again."—Mrs. FRED BEHNKE, Marinette, Wis.

Detroit, Mich.—"When I first took Lydia E. Pinkham's Vegetable Compound I was so run down with female troubles that I could not do anything, and our doctor said I would have to undergo an operation. I could hardly walk without help so when I read about the Vegetable Compound and what it had done for others I thought I would try it. I got a bottle of Lydia E. Pinkham's Vegetable Compound and a package of Lydia E. Pinkham's Sanative Wash and used them according to directions. They helped me and today I am able to do all my work and I am well."—Mrs. THOS. DWYER, 989 Milwaukee Ave., East, Detroit, Mich.

Bellevue, Pa.—"I suffered more than tongue can tell with terrible bearing down pains and inflammation. I tried several doctors and they all told me the same story, that I never could get well without an operation and I just dreaded the thought of that. I also tried a good many other medicines that were recommended to me and none of them helped me until a friend advised me to give Lydia E. Pinkham's Vegetable Compound a trial. The first bottle helped, I kept taking it and now I don't know what it is to be sick any more and I am picking up in weight. I am 20 years old and weigh 145 pounds. It will be the greatest pleasure to me if I can have the opportunity to recommend it to any other suffering woman."—Miss IRENE FROELICHER, 1923 Manhattan St., North Side, Bellevue, Pa.

If you would like special advice write to Lydia E. Pinkham Med. Co. (confidential), Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

Interest Growing in
Voting Contest

Whole Community Enthused -
Contestants on the Job All Time

The candidates and others in-
terested in the Press voting contest
will soon have the opportunity of
seeing the piano which is to be
given to the one having the most
votes. To own a \$400 piano will
be the privilege of some one in this
section thru this contest while
others will win valuable prizes and
work is required to win, that's all.
The contest is but three weeks
old and votes are coming in by the
thousands. Nothing is more talked
of in this community at present.

The town and country are being
thoroly canvassed and the mer-
chants are continually being asked
for coupons. Many friends are
ready to help the contestants and
are only waiting to be asked. The
first to ask them will get their sup-
port. Get busy.

The first count will be made on
May 9th, at which time \$10 in gold
will be awarded to the contestant
having the largest number of votes
at the time. Remember to have
your friends save the merchants'
coupons. The Merchants are:

C. H. Whitman
John D. Blaine
Farmers Union
Orchard City Drug Co.
Campbell Market
E. E. Sower

The following gentlemen have
been suggested to act as awarding
committee and count the ballots
and if no objections will constitute
the committee:

James Fabinger
B. O. Curry
Ralston Alison

The contestants who have be-
gun the race are given here and if
others are busy and have not told
us, let us know at once.

Ruby Crow
Eleanor Carter
Genevieve Davis
Valeria DeRemer
Ruth Dunning
Gladys Lowry

Local and Personal

Keep May 5th in mind.

Guind supper, Friday, April 28th.

Ask merchants for contest coupons.

Will E. Wright came over from Pacifi-

c Grove Monday to look after his ranch.

W. K. Miller arrived this week from

Modesto and is getting settled on his

ranch on Hazel Ave.

The ladies of the Congregational

church will serve supper in the church

parlors next Friday, April 28th.

Miss Emma Swope is taking her an-
nual vacation and at present is visiting

Mrs. C. H. Antrim at Los Angeles.

Mr. and Mrs. Louis Bersinger autoed

up from Hollister Wednesday for a short

visit with Mr. and Mrs. R. G. Archibald.

Men's Elk Skin Shoes \$2.50 and

\$2.75. We give coupons on Piano

contest. E. E. SOWER, Campbell, Cal.

Mrs. Bertha Page and Mrs. Meda

Waite attended the meeting of the trus-

tees of the county school districts in San

Jose Saturday.

C. U. H. S. plays the last C. I. F.

game on the local diamond, with Los

Gatos on Friday, April 21st, at 3 p. m.

Admission, 10c.

Miss Myrtle Annot has returned from

a visit of several months with her brother

in Ohio, and Mr. and Mrs. Leslie Schafer

in Pennsylvania.

J. A. Martin has sold his property,

known as the Hutchins ranch, on Los

Gatos road, to Geo. Dolfin. Mr. Martin

may decide to remain in this locality.

The High baseball team played an-

other I. A. U. game Friday afternoon

with Mountain View, defeating that team

by a score of 9-0, a repetition of the

score for a similar game last year.

Mr. and Mrs. W. T. Morton started

Wednesday on an auto trip to various

points in the San Joaquin where Mr.

Morton will look after business. They

will be gone until the first of the month.

Mrs. A. L. Adam received word of the

death of her grandmother, Mrs. Anna

M. Morris, Tuesday, the 11th, at Cleve-

land, Ohio. Mrs. Morris lived here for

some time and was a member of the

local M. E. church. She has lived for

some time with another granddaughter,

Mrs. Woodley, where she passed away,

at the advanced age of 77.

The special meetings during Passion

week at the Congregational church are

creating a good deal of interest, and

are proving to be of real value. On Friday

the church will be open from noon to

3 o'clock. Devotional services at 12:30,

1:20, (at which the Pastor will speak on

"The Last words from the Cross," and a

somewhat more formal service at 2:30

when the Pastor will give a "Good Fri-

day Meditation" on "Who took the Life

of Jesus?"

The meeting of the Home and School

Club last week was very interesting. The

program included delightful vocal num-

bers by Dr. W. I. Merrill and Mrs. W.

W. Powell, humorous readings by Mrs.

R. Alison and Mrs. H. C. Smith, and a

most interesting printed report of a state

committee on "Recreation for Schools

and Towns," read by the president, she

choosing the section applying to rural

schools and communities. Considerable

business was transacted and a success-

ful candy sale conducted.

The "Evening with Paul" which Mrs.

K. E. M. Cleaves gave at the Congrega-

tional church Sunday evening was a

very beautiful and inspiring service.

Her readings of "Paul's Interpretation

and Defense of the Resurrection" and

"Paul before Festus and Agrippa" were

wonderful expositions, and the solos

which accompanied them were equally

spiritual. Mrs. Cleaves very generous-

ly sang two numbers at the morning

service and read a story "Fishin' Jim-

mie", based on being "fishers of men"

for the C. E.

Some Chick Town, This

Considerable newspaper notoriety has
been given to a nearby town because of
the shipments of baby chicks from that
point, the numbers quoted being 1700

in one day.

Two of the Campbell hatcheries, "The

Campbell Poultry Ranch," J. H. Stubbe,

owner; and "The Roofden Poultry

Ranch," G. M. Ellison, owner, have

been shipping from 7,000 to 10,000

chicks a week, one day's shipment be-

ing 9,000.

These day old chicks are sent to all

parts of California, and to the neighbor-

ing states of Oregon, Utah, Idaho,

Nevada and Arizona.

Campbell is certainly on the map

when it comes to poultry and eggs, as

well as in the fruit industry, as these are

only two of the many engaging in this

business.

These day old chicks are sent to all

parts of California, and to the neighbor-

ing states of Oregon, Utah, Idaho,

Nevada and Arizona.

Campbell is certainly on the map

when it comes to poultry and eggs, as

well as in the fruit industry, as these are

only two of the many engaging in this

business.

These day old chicks are sent to all

parts of California, and to the neighbor-

ing states of Oregon, Utah, Idaho,

Nevada and Arizona.

W. C. T. U.

There have been some specially good
features in the meetings of Campbell
union of late.

The Dry Federation Institute brought

a number of state and county workers,

Opening devotionals upon "The Spir-

it of the Crusade and the Work of To-

day" was fittingly emphasized by Mrs.

Winans. Rev. Atkinson and Rev. Lloyd

led in prayer and words of greeting.

Mrs. Pringle proved a competent

leader, suggesting wise and helpful

methods.

"Effective Methods of Publicity" were

discussed. "Thru Advertising" by

Mrs. H. C. Smith, a happy combination

of humor and common sense, "Thru

Organization" by Mrs. Pringle, "The

Printed Page" by Mrs. Dorr and "Indi-

vidual Effort" shows careful preparation

and familiarity with the subject, as did

also the talk by Mrs. Dorr, upon "What

to do and what not to do".

At the Coffee Club luncheon was

generously served by the hostess union and

all were invited to remain. Devotional

service led by Mrs. Ellen R. Smith was

uplifting and it is to be regretted that

every Christian citizen was not present

to receive its inspiration. The beauti-

duets by Mrs. Powell and Mrs. Jackson

were thoroughly appreciated.

The able papers by Mrs. McClintick

and Miss Griffith were full of wise sug-

gestions of much practical value to the

workers. Mrs. Dorr spoke, Mr. Lloyd

Atkinson, Whitman, as collaborators.

In the evening a Medal Contest was
